IETE STUDENTS DAY MESSAGE FROM PRESIDENT, IETE

Dear Students,

I extend my greetings on the second 'IETE Students Day' being celebrated on February 1, 2012. I wish to reiterate that student community forms a significant and important segment of this great organization. We would like to assure you that our endeavor is to make IETE, a students' friendly institution.

IETE today, is one of the prominent technical education providers in India and is fast expanding its wings across the country through its 61 Centres. Over the last 59 years, IETE has expanded its educational activities in areas of Electronics, Telecommunications, Computer Science and Information Technology. We conduct programmes leading to DipIETE equivalent to Diploma in Engineering, AMIETE equivalent to B Tech, ALCCS equivalent to M Tech. IETE has also started Dual Degree, Dual Diploma & Integrated programs from December 2011.

Our concern has always been to provide quality technical education that enhances the employability of its students. To keep the technical edge, Academic Committee and Board of Examinations continuously review the syllabus and update it to suit the needs of industry. Virtual Electronic Lab CDs have been developed and are distributed with the Lab Manuals to support students in Lab practice. Association of Indian Universities (AIU) has recognized AMIETE. Government of India has already given recognition to all our educational programmes.

IETE has voluntarily adopted socially relevant and progressive programmes especially aimed at the weaker and underprivileged sections of society. It is our endeavor to empower the students from the weaker sections of the society imparting technical education at a very affordable cost, thus paving the way for inclusive growth. Furthering our social responsibilities and obligations to the society, we have launched a merit-cum-means scholarship scheme. IETE has started "M Tech Stipend programme", to distribute stipends to regular IETE Graduates for pursuing M Tech Studies anywhere.

IETE has realized the fact that the real hurdle for students for successfully completing the education is proper coaching in the subjects. Therefore, all our Centres are being encouraged to gear up to provide coaching and study material. To strengthen our efforts we have started an ambitious programme of "Education in virtual class room mode through EDUSAT facility".

Student Interaction Committee is given the responsibility of interacting with the student community and suggest ways and means of improving the system. Already a single window concept has been implemented at HQ IETE. New schemes are being introduced to improve the examination system so that the results are published at the shortest possible time. Efforts are also on to provide placement assistance to our students.

It is heartening to know that there are many IETE alumni occupying very high positions in government and private sectors. IETE Alumni Association is formed to promote and foster interaction between the Alumni and students.

I wish you a very Happy Students Day and once again urge you to make it a memorable event.

(R K GUPTA)
President
