About IETE

Founded in 1953, The Institution of Electronics and Telecommunication Engineers (IETE) is a leading professional society devoted to the advancement of Science & Technology in Electronics, Telecommunications, Information Technology, Computer Science and other related disciplines. IETE serves its more than 1.2 Lacs members and 450 Organisational/Institutional members both individuals and industries / organizations through its 64 Centres spread all over India including one in Kathmandu (Nepal) and 2 PACs (Professional Activity Centres) in Perth (Australia) and Seattle USA. The Government of India, Ministry of Science and Technology, Department of Science & Industrial Research has recognised IETE as a Scientific and Industrial Research Organisation (SIRO) and the Institution has also been notified as an Educational Institution of National Eminence by the Government of India. The Institution provides leadership in scientific and technical areas of direct importance to the national development and economy. Developing and improving technical and professional competencies, particularly in the working environment, is the greatest challenge that professionals all over the world face today. To help its members, both in India and abroad, avoid technological obsolescence and to achieve the mission of advancing the profession, IETE offers access to latest developments in the technology via conferences, workshops, publications and brainstorming sessions. Mid-Term Symposium, which is one of the flagship events of the institution is one such programme.

About the Conference

IETE's 2nd International Conference on Smart Mobility Systems (ICSMS 2026), is being organized by The Institution of Electronics and Telecommunication Engineers (IETE) at the Osmania University, Hyderabad. ICSMS 2026 will offer a valuable platform for researchers, engineers, and industry professionals to collaborate and exchange ideas. It will focus on intelligent transportation systems and cutting-edge technologies such as electric vehicles (EVs), security in ITS, IoT in transportation, human-centric AI, driving data analytics, and driver behavior analysis for decision-making. The conference will cover a broad range of topics, including machine and deep learning in ITS, management of road, air, water, and rail transportation, vehicle safety systems, driver and traveller support systems, Automated Driving System (ADS) assistance, social transportation, intelligent mobility, and smart transportation solutions. The conference will feature:

- Keynote addresses from industry and academic leaders.
- Tutorials for participants and students.
- Paper presentations, with awards for the best papers.

The IETE's 1st International Conference on Smart Mobility Systems (ICSMS 2025) was successfully organized by The Institution of Electronics and Telecommunication Engineers (IETE) at its New Delhi Headquarter during 22 and 26-27 April 2025. The conference witnessed an overwhelming response, with over 311 paper submissions from researchers and professionals worldwide. Following a rigorous peer-review process, 33 high-quality papers were presented and published in **the book series: Lecture Notes in Networks and Systems (LNNS, volume 1669)**(<https://link.springer.com/book/10.1007/978-981-95-3156-1>) of the springer Natures, reflecting the conference's strong academic standards and its contribution to advancing research in smart mobility systems.

CMT ACKNOWLEDGMENT: The Microsoft CMT service was used for managing the peer-reviewing process for this conference. This service was provided for free by Microsoft and they bore all expenses, including costs for Azure cloud services as well as for software development and support.

Call For Papers

Papers are invited for submission from academicians, entrepreneurs, service providers, policy makers and government agencies including PSUs and MSMEs in the realms of advanced technologies, employee upskilling, process reimaging, and the cultivation of cultures particularly in relation to systems of smart mobility.

Technical Tracks

1. Smart Mobility
 - AI based agent for traffic and transportation systems
 - Edge AI and 3D perception on smart mobility
 - Multi-resolution simulation for service and interoperability
 - Collaborative learning in traffic and transportation models
 - LiDAR in smart communication
 - Intelligent multimodal transportation and logistics efficiency -

- leveraging advanced technologies to optimize operations, improve sustainability, and enhance user experience
- Next Generation Tolling Systems using Global Navigation Satellite System (GNSS)
- AI based CCTV monitored surveillance
- 2. Electric Vehicle (EV) and Emerging Technologies
 - Emerging transportation technologies
 - Testing methodology for standardization and industry implementation
 - Modular vehicle, urban air mobility, smart rail for sustainable development
 - Automated vehicle technologies (AVT)
- 3. Intelligent Security Systems for Smart Transportation
 - Security and privacy in intelligent transportations
 - Intelligent agents for security analytics
 - Cyber security models for smart transportations
 - Cyber security for connected and automated vehicles
- 4. IoT in SMS
 - Software defined transportation systems
 - Cloud and edge computing for connected vehicles
 - AI and Big Data applications in smart city mobility
 - Remote driving
- 5. Human Centric AI in ITS
 - Future of smart and safe road: challenges in integration and scaling
 - Human centric automated driving systems
 - Collaborative learning-based AI for human centric ITS
- 6. Driving Data Analytics
 - Traffic flow dynamics in ITS
 - Cutting edge technologies for intelligent vehicle
 - Analytics on real world driving situations

Instructions To Authors

Registration Fees :

Author as Faculty/Scholar (paper) : Rs. 5000 + 18% GST (at least one author must be registered, 10% less for 2nd and other author registration).

IETE/IEI/IEEE/CSI (Authors) : Rs. 4500 + 18% GST
